Thank you for your continued support with this meager project! I am amazed at the number of "out of region" folks who download this list - hopefully they are planning to visit Southern California in the near future! In addition to "traditional" repeaters, there are the ISS FM voice freqs, ISS packet and SSTV freqs, and a few minor edits. Also included is satellite AO-85 - AMSAT-NA's FOX-1A. A little harder to get in to than originally designed, but a GREAT downlink on 2M!

*There are hundreds more systems in So. California that aren't listed.* The coordination bodies in Southern California are ...

Two meter systems - <http://www.tasma.org/repeaters/2m-repeaters/>  
 440 systems - <http://www.scrba.org/>

**ENJOY!** The latest version of this list will always be available on the DOCS page at <http://www.k6lcs.com>. And cruise by my "Work the Satellites" site, too, at <http://www.work-sat.com>!
